

Abbotsford, Sumas & Matsqui News

Twelfth Year. No 30

Abbotsford, B.C., Wednesday, July 24th, 1935

Ten Cents per Month.

BRADNER

Mr. J. Munro has received word of the death of his brother, William H. Munro of Vancouver, after a long and painful illness. The late Mr. Munro was injured four years ago, at North Vancouver, when he was crushed by a log falling on him.

Mr. and Mrs. Wilfred Chittenden of Harrison Lake are the guests of Mrs. Chittenden's parents, Mr. and Mrs. Middleton.

Guests of Mr. and Mrs. W. Winchester last week were Mr. and Mrs. A. W. Valley of Vancouver.

Mrs. G. H. Loach and Miss Arscott have returned home from a visit to Gambier Island.

Mr. John Connor, who was stricken ill last week, is a patient in the M.-S.-A. hospital.

Mr. T. Connor has commenced erection of a new house, replacing the one recently destroyed by fire.

STORE MANAGER SUSTAINS SEVERE EYE INJURY

Bob Carlson, manager of the Over-the-hill store in Abbotsford, is a patient in Vancouver General Hospital, for an operation to his left eye, which was dangerously injured last evening by a glass cut. He was driving along Interprovincial highway near Rudge's when a rock, thrown by the wheels of a passing truck, struck and perforated his windshield, a glass splinter lodging in the iris of his eye. Medical opinion is hopeful that his sight will not be impaired.

MATSQUI

Mr. and Mrs. J. W. Rankin and baby of Powell River are guests of Mr. and Mrs. A. Whitson.

Mr. G. Stewart, who is working in New Westminster, spent the weekend at his home.

Mr. Stuart Duncan has recovered from his collapse due to the heat, last week.

Mr. and Mrs. Jacobson have returned to their home in the Cariboo after visiting with their son-in-law and daughter, Mr. and Mrs. MacQueen.

Guests at the home of Mr. and Mrs. E. Farr are their daughter, Mrs. G. Matthews of Burnaby and their son, Mrs. Ernest Farr of Calgary.

Miss Unice Olsen of Vancouver is visiting Mr. and Mrs. M. Ellerson.

A fair-sized crowd attended the C.C.F. dance in Gifford hall last Friday evening. Winners in the draw were R. Grohner, Clayburn; M. Gohlos, Kilgord; D. Nicholson, Mt. Lebanon; M. French, Mission; A. Pearson, Peardonville; Mrs. J. Clarke, Abbotsford.

Report is current that Hungarians of the Poplar district have been taken to New Westminster during the past two weeks as strike-breakers in the longshoremen's disturbances.

SUMMER YACHTING DAYS ARRIVE IN GULF WATERS

Those who have rode the seas behind the billowing sail will see beauty in these skudding dinghies, cleaving their graceful path through the dancing waters of English Bay. For this is the yachting season in west coast waters, and for those who have tasted of its pleasures, it remains an enduring interest.

SUMAS ROAD PAVING STARTS

Paving crews of the Columbia Bimulithic Co. started work on Saturday laying the priming coat of mulch on the Sumas lake road. Instead of detouring traffic over Vye road for the entire period work is in progress estimated to be six weeks, it is hoped that one-way lanes may be made available at certain periods.

MR. E. WEBSTER RE-ELECTED TO ABBOTSFORD SCHOOL BD.

Annual meeting of Abbotsford Rural School District was held in the public school on Wednesday, with about 50 voters attending.

Financial statement was read and approved and other matters discussed.

Mr. E. Webster, retiring school trustee, was unanimously re-elected for a term of three years, in the event of the present school board system continuing to function.

Mr. N. Hill was re-appointed auditor.

An open discussion took place concerning the proposed school board merger and its effect upon Abbotsford's school affairs.

FREE PUBLICITY

The matter of free publicity continues to provide material for editorial comment in Saskatchewan weeklies. The Swift Current Sun, in part says:

"Some people have the misguided impression that a newspaper in under public ownership. Such is not the case. We weigh the merits of free publicity and always err on the side of generosity. But we do sometimes become annoyed when people demand certain things published according to their will. We feel we should be guided by the more or less strict tenets of newspaper writing. When one buys an article at a store one is entitled to have it wrapped up and some string around it. On the other hand try to walk into a store and say, 'Give me four cans of pork and beans for nothing and be sure to put a green ribbon around it'. That just about sums up what a newspaper is up against a great deal. We aim to please and think we do, but sometimes have to rebel against the attitude taken by some people."

The owner of the Rocanville Record editorially discusses his financial responsibilities and concludes by stating that if all the printing requirements of Rocanville were printed by the Record, the plant would have to double its present staff. The editor points out the service the public expects and gets and adds that the public should return the compliment and get its printing done in Rocanville.

ABBOTSFORD

Mrs. G. Gleeson and children have returned from a vacation spent at Bowen Island.

Mr. T. Mathers has purchased a new Ford V-8 light delivery truck from Abbotsford Motors.

Mr. T. Barrett has resumed his duties at the post office, after a holiday spent at coast points.

Mesdames Van Kasteren and Des-Mazes returned from Shore Acres on Tuesday after a holiday.

Masters Franklin and Maurice Davis entertained at their birthday party on Wednesday afternoon.

Mrs. G. Bader arrived home on Tuesday from Holland, where she visited relatives.

Mr. and Mrs. E. J. Rock of California are visiting the latter's sister, Mrs. F. Rudge.

It is hoped to have the Rev. W. H. Adcock of Regina, as preacher at St. Matthew's on Sunday. Mr. Adcock is one of the most outstanding men in Canadian public life at the present time, from a Christian viewpoint, and one of the country's foremost sociologists.

Murray Ralston is assisting at the Willan Hardware for a few weeks.

Born.—To Mr. and Mrs. H. Fredrickson, Matsqui, in the M.-S.-A. hospital on July 18, a son.

H. J. Barber, M.P., is expected to address a meeting of local Conservatives on Friday in the Oddfellow's hall.

Rev. T. L. Rimmer spent a few days last week at Camp Artaban.

If you wish to be fair...

PRINTERS in the Fraser Valley are endeavoring to meet from nearby cities a class of competition which destroys business — less-than-cost prices — which, like the scabbing in other lines of work, breaks down the workers' livelihood. If the farmer, mechanic and small business man cannot get a living for his family, what happens?

Forced out of employment by automatic machinery, certain Vancouver journeymen printers have got use of idle presses and type, taken their children from school and set up in business under sweatshop conditions, pricing work at bare cost of paper. For what? ... sacrifice themselves, like many others, at the altar of "unforced overhead" ... and drag down other small printeries with them.

Hardware, grocery, automobile and other lines have organized against this eruption of Bad Business. Established printers are desperately endeavoring to do so.

Proximity to Coast cities has always made The News subject to this class of competition. Some of it the local shop can't meet. Most of it it CAN AND DOES meet. This has been our offer in the past; we reiterate it—
15% Discount upon every class of ordinary job printing from the trade list of any western city or town in Canada, Winnipeg west. This price applies, and has applied only to "local" work—printing used locally—work which the home shop needs and must have in order to carry on.

If you want to be fair, this is a fair offer, based upon overhead economy.

SPORT BRIEFS

Abbotsford Mill softball team found to their sorrow that Matsqui is a hard nut to crack on its own pasture. The homesters won handily, 13 runs to 3.

The mill softball team and Slim's met on Monday evening, but darkness caused a halt before the game was finished. Slim's were ahead when the struggle halted, but the game will have to be replayed.

Abbotsford all-star softball team play an exhibition game in Vancouver next Saturday evening, against West Hotel.

The Abbotsford swimming pool is a crowded spot these days. Every afternoon a large number of youngsters—and adults too—through the pool in an effort to keep cool under soaring temperatures. Incidentally, by the appearance of some of those kids, a sun-tan contest here would get lots of entries.

Attagarders met the Peardonville softball team on Tuesday evening amidst the tall timbers, with the hotel boys finishing well in front.

Biggest upset of the season took place on Tuesday evening, when the formidable Matsqui eleven bowed in defeat to Abbotsford mill team. Final score was 12-5 for the mill men.

Abbotsford All-stars meet the Cultus Lake team at the resort this evening (Wednesday).

NUMEROUS TRANSIENTS

PASSING THROUGH DISTRICT

An unusually large number of transients are passing through the district since the advent of warmer weather. Police report on one occasion over thirty attempted to camp by the B.C.E.R. and C.P.R. tracks north of town. The "hoboes" seem to be mostly young men and are believed to be part of the "jobless army". The police are keeping them moving, and no complaints have been received concerning their actions.

DOGS KILL VALUABLE SHEEP

Four valuable pure bred sheep, part of Mr. A. C. Stewart's prize-winning show stock, were killed by dogs on Monday night. While positive identification of the killers could not be made, four dogs in the neighborhood were shot as a precautionary measure.

Mr. A. McNeill of the Daly staff is holidaying this week at Cultus Lake.

NOTICE

Chilliwack Electoral District

Temporary Closing of Arterial Highway, Abbotsford to Sumas Pumping Station

By Regulation of the Minister of Public Works, dated July 23rd, 1935, pursuant to Section 33 (3) of the "Highway Act", the Trans-Canada Highway, from its junction with the Abbotsford-Huntingdon Road (approximately one-half mile south-east of Abbotsford) to Sumas Pumping Station, has been closed to all traffic from 8 a.m., July 24th, 1935, until otherwise ordered, during surface construction.

Detour is available.
(Signed) A. DIXON, Chief Engineer

Department of Public Works, Victoria, B.C.
July 23rd, 1935.

ABBOTSFORD

Representatives of Abbotsford, Sumas and Matsqui School Boards met Hon. Dr. Weir in Vancouver last week to further discuss with him plans for placing the three districts under government control, to be administered from Abbotsford. Personnel of the delegation was P. H. Carr, O. Heywood, H. Day, P. H. Dawson, Mrs. H. Fraser, E. Webster, G. F. Pratt.

Miss Norma Archie of Prince Rupert, B.C., is visiting with her aunt, Mrs. Rolis, who is housekeeper to Mr. J. Higginson.

Mr. H. Onions is still receiving treatment in Shaughnessy hospital. His condition is improving.

Mr. and Mrs. Giffillan and family are spending their vacation at Cultus Lake.

Miss Celina Rowles of the M.-S.-A. hospital staff is spending a week at Cultus Lake.

Miss Gwen Caldecott returned from Camp Artaban, Gambier Island, on Monday, after a week at the Leaders' Camp. Vernon and Harry Amos are also holidaying there.

Mr. Wakefield plans erection of a residence on his farm near Reeve Hougens place. Rural Contractors have the job.

Mrs. R. Walker, Marigold Beauty Shoppe, is undergoing a tonsil operation in Vancouver General hospital.

Miss M. Walker of the B. C. Telephone staff is spending a few days visiting her aunt, Mrs. Best of White Rock.

Howard Ralston and Bob Webster has returned from a week's holiday at Cultus Lake.

Miss Jeanette Wilson of Vancouver visited Miss Mary Webb last week.

Mr. and Mrs. W. Schnare and son Stanley left on Wednesday by auto for Alberta, where they will visit relatives in Calgary, Edmonton and other points.

Mr. D. Willan is away on his holidays. Mr. Harry Walker operating the hardware store in his absence.

Mr. and Mrs. W. B. Holtsbaum and daughter Lois of Provost, Alta. are staying with relatives here while on a motor trip at the Coast.

PEA HARVEST UNDERWAY

Matsqui is reporting a good pea crop, and the cannery at Mission is in full blast with seasonal activity.

Pea moths reduced the value of the Sumas Prairie crop last year by some \$25,000, it is estimated, and this year the pea acreage is only 25 per cent. of last year's cultivation. It was hoped that the winter flood would drown out the grubs that lay in the soil in their winter cocoons. But they came through in perfect condition—their silken bags were waterproof.

No certain check to the pea-moth has yet been discovered.

WORLD HAPPENINGS BRIEFLY TOLD

It was officially announced 102 persons lost their lives in the munitions factory explosion at Reinsdorf, Germany, June 13 and 723 were injured.

Britain has invited Russia to naval talks. It is suggested Russian naval experts shall come to London after visits by French and Italian delegates.

Total gross agricultural revenue of British Columbia in 1934 is estimated at \$39,826,141, compared with \$36,647,007 in 1933, in statistics released by the provincial government.

An aerial traffic survey, to determine whether traffic cops could help unsnarl New York's crowded Sunday motor traffic, was made by First Deputy Police Commissioner Harold Fowler.

The Cahan bill amending the Franchise Act passed through the House of Commons. It would prevent judges from upsetting decisions of franchise registrars without positive evidence.

Prof. Karl Barth, of the University of Bonn, was indefinitely suspended from the chair of theology for his refusal to take an immediate and unconditional oath of personal loyalty to Chancellor Adolf Hitler.

Salvage experts have made plans to attempt to locate the wreck of the Lusitania, sunk by a German submarine 20 years ago. A. A. Bestic, surviving officer of the vessel, will participate.

A bleached skeleton, identified as that of Herman Nothnagel, Spiritwood, Sask., farmer, was found two miles from his farm by Joe Doucette, of Spiritwood. Nothnagel had been missing from his home since June 1, 1934.

Accompanied by nine college students, two sheep and 60 chickens, Captain Bob Bartlett, author and explorer, sailed from New York in his schooner, Effie G. Morrissey, on the first leg of his ninth trip to Greenland.

Canada's military forces are represented in the supplementary estimates tabled in the House of Commons by estimates for all three arms of the service. For the militia the appropriation is \$1,651,000; for the naval service, \$145,000; and for aviation, \$1,302,900.

An Amazing Apparatus

Enables One To See And Read With Eyes Closed

A Canadian physician's device which enables one actually to see and read with the eyes tightly closed, is attracting much attention at the scientific exhibit of the American and Canadian Medical Association at Atlantic City, N.J.

The apparatus is the work of Dr. A. Howard Pirie of the Royal Victoria Hospital, Montreal, and is based on his discovery that X-rays, contrary to hitherto prevailing belief, can be seen by the human eye.

Physicians have pressed their closed eye against an eye-socket in front of the X-ray tube and, to their amazement, have been able to read words and see pictures just as though their eyes were open.

Dr. Pirie is using it in detecting the location of foreign bodies lodged in the eye and to determine whether a damaged condition exists in the retina.

Origin Of Pall Mall

Street Named For Game Played In The 17th Century

Most people have heard of a street in London called Pall Mall, and this is how it got its strange name. In the 17th century there was a very popular game in London called Pall Mall, identified with croquet which is still played to-day. It was popular with most of the gentry. The object of the game was to drive a ball along a straight alley and through an elevated ring with a mallet. The alley for pall mall was hardened and strewn with pounded shells so as to present a perfectly smooth surface. The game has completely died out, for there is no trace of it for centuries, and the only relic of the game is in the name of Pall Mall street.

Editor's Son: "Did you ever have a great ambition when you were a boy of my age?"

Editor: "Certainly. My one wish was to wear long pants. I got my wish, because, if there is anyone else in this country that wears his pants longer than I do, I'd like to meet him."

London will provide facilities for "family" bathing at public pools.

World's Greatest Racing Classic

ABOVE: SCENE IN THE "PITS" A CAR IN FOR GAS LEFT: KELLY PETILLO, WINNER, AND HIS MECHANIC

Unfortunately the average spectator at the annual Indianapolis Speedway Classic is unable to witness much of the tense drama of the race, which takes place in those little concrete-walled boxes known as the "pits," located on the "apron" of the track near the starting point. Here the "teams," composed of a dozen men—a necessary organization for every entrant—perform their duties in an atmosphere tense with excitement but with the precision of a well-drilled stage show. Without their help no driver would stand a chance of winning.

Their is the directing genius behind the strategy involved in this four-and-a-half-hour contest. Whirling around the two-and-a-half-mile rough brick oval at speeds approaching 150 miles an hour, their senses reeling from the thunder of their motors, the fumes from the engines, and the eye strain, the drivers lose track of their position and their speed.

It is the pitmen who keep them informed on these important matters, and advise them regarding strategy through a complicated system of signaling. When to come in for water and gas, and who the leaders are at the moment are among the many pieces of information that the driver must depend upon his pit crew for.

The operations in the pit are as thrilling, at times, as the actual race itself. A car slides onto the apron and stops in front of its own pit. Half a dozen men leap the low concrete wall, each concentrating on a definite job. The cap is off the radiator in a second and a stream of cool water is flowing in; gasoline is already being poured into the tank; tires are examined; and two men lift

the hood and their expert eyes and ears can tell in a split second whether all parts of the engine are synchronizing.

One or two A.A.A. officials dash up. The pit crew gives them an anxious glance, for their inspection may mean loss of many precious seconds—possibly elimination from the race. These officials have the authority to order adjustments, and, if in their judgment the car has a defect, to order it from the race as a precaution of safety for all concerned.

Kelly Petillo won this year's race, setting a new track record of 106.24 miles per hour. Each of the two times Petillo stopped at the pits, he was seen to continue to sway in his seat, not yet recovered from the effects of the bodily rhythm induced by the terrific car-swing at high speed. Peter DePaolo, his pit manager, shouted advice into his partly deafened ears and within a minute or so Petillo was back on the track with a fresh supply of gas and water, and his engine in perfect tune.

Petillo frankly stated after the race that much of the credit for his performance was due to two factors—his pit manager and his tires. The winner said he was tempted several times to "burn up" his car early in the race to catch the several drivers then ahead of him. "I knew my Firestone tires would stand any speed my car could go," he said, "but I had my instructions from Pete DePaolo. He worked out the plan of campaign and I followed it." DePaolo signalled instructions to Petillo on almost every lap of the 200.

In the pits, too, watching and checking car performance, is the engineering genius of the country.

Take tires for instance. The recent race marked the sixteenth consecutive contest in which Firestone tires had been on the winning car. Firestone engineers and designers were in the pits throughout the race, checking every phase of the cars' performance. The drivers buy and pay for their tires, and have for years. Firestones were on all cars that finished and there was not one tire failure. With new records each year, the problem for tire and motor car engineers is ever new.

FASHION FANCIES

DARLING DRESS SO SIMPLY CUT—POCKETS, APPLIED BAND TRIM, GIVE IT FRENCH CHIC

By Ellen Worth

It is difficult to imagine anything easier for mother to tackle than this darling little dress.

It's so simply cut, depending on two cleverly placed pockets and colorful banded trim for its chic and individuality.

The first model was of pale blue linen-like cotton. One band was of navy, one of white and one of a red and white print.

Checked seersucker in red, white and blue is very effective with red, white and blue band trim of pique, with the blue pique used for the pockets.

Style No. 753 is designed for sizes 6, 8, 10 and 12 years. Size 8 requires 1 1/4 yards of 39-inch material with 1/4 yard of 35-inch printed material and 1/4 yard of 35-inch plain material. Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

Recipes For This Week

(By Betty Barclay)

SPANISH SAUSAGE

- 1 pound pork sausage
- 6 small green peppers
- 1 cup bread crumbs
- 1 cup tomatoes
- 1 onion, grated
- 1 cup diced celery.

Mix sausage, bread crumbs, grated onion, and diced celery. Moisten with tomatoes. Cut tops off green peppers, remove seeds and parboil for five minutes. Stuff with sausage mixture and bake in a moderate oven (350 degrees F.) for 30 minutes.

MUSTARD SALAD DRESSING

- 1/4 cup sweetened condensed milk
- 1/4 cup tomato catsup
- 1/4 cup prepared mustard

Thoroughly blend sweetened condensed milk, tomato catsup and prepared mustard. Chill. Serve on lettuce or vegetable salad. Makes 3/4 cup.

New Rolling Stock

C.P.R. Is Calling For Tenders For New Equipment

As a preliminary order in the new equipment program provided for by the Unemployment Relief Act, it was announced the Canadian Pacific Railway had invited railway car companies to submit tenders for 1,500 new freight cars. Additional units, including passenger cars and locomotives, will be ordered later.

The invitation for tenders just issued includes 750 box cars, 300 coal cars and 150 refrigerator cars.

It takes eight gallons of special oil to give each of the elephants in the London zoo its annual "beauty bath."

Little Journeys In Science

HUMIDITY

(By Gordon H. Guest, M.A.)

Humidity not only has an important bearing on the comfort of man but it has also a marked effect on his daily affairs. The story of humidity begins with the fact that water vapour is a normal component of the earth's atmosphere. Water vapour is simply water in the gaseous state. It is invisible and we cannot become aware of it directly by our senses. Unlike all the other components of the atmosphere, nitrogen, oxygen, argon and the rest, the amount of water vapour present in the air varies greatly from time to time and from place to place. It is sometimes present in the air to the extent of 5 per cent. by volume, and occasionally the amount is too small to be measured.

The air is furnished with water vapour by the evaporation of water in liquid or solid form, as contained in oceans, lakes, rivers, snowfields and plants. The amount of water vapour which the air can hold depends upon the temperature. Warm air can hold more water vapour than cold air. Strictly speaking, the temperature limits the amount of vapour that can occur in a given space regardless of the presence or absence of other gases, and in scientific language we say that the air is saturated with water vapour when it contains the maximum possible amount of the vapour.

If the air is fully charged with water vapour, or in other words saturated, any drop in temperature will cause some of this gas to change to a liquid or solid. This is due to the fact that cold air cannot hold as much water vapour as warm air. In science we say that some of the water vapour has condensed, and the condensed water forms a fog or cloud in the air. Eventually the process may lead to the production of rain or snow.

With the aid of an instrument known as the hygrometer, scientists measure the relative humidity and this value is expressed in percentage. Thus if at a certain time the air is charged with water vapour to half its capacity, the relative humidity is said to be 50 per cent. When the air is saturated with water vapour, the relative humidity is 100 per cent.

Relative humidity plays a very important role in human affairs because it is one of the chief factors in the process of evaporation. When the relative humidity is low, evaporation takes place rapidly from all moist surfaces exposed to the air. When the relative humidity increases, evaporation slows down, and when it reaches 100 per cent., evaporation stops. The seasoning of lumber, drying of fruit, vegetables, fish and the family wash, as well as many other familiar operations, require a comparatively low relative humidity of the air for their rapid performance.

Humidity has a marked effect upon human comfort. The saying that "it's not the heat but the humidity" contains a great deal of truth, though it is not the whole truth. Our sensations of heat and cold depend upon the rate at which heat leaves our bodies, and this is regulated, so far as atmospheric factors go, by the cooling power of the air, which depends upon three things: temperature, wind and humidity. The thermometer may climb into the nineties, yet if the humidity is low we remain comfortable, especially if a breeze is blowing. Such temperatures combined with high humidity are unbearable.

Europe has 11 ruling monarchs left—10 kings and a queen. There are only 17 ruling monarchs in the entire world to-day.

If you're in doubt whether it's a weed or a useful plant, in nine cases out of ten it's a weed.

Household Arts

PATTERN 5365

Time—so valuable to every one of us—is especially conserved for the knitter in this unusually attractive jiffy-knit blouse. Big needles—a lacy stitch and the result is a blouse done in no time. And, what none of us object to, it takes little wool to make it. The tied yoke is all in one with the sleeves which, of course, simplifies the making of it. Another feature is that the top of the blouse is really a straight line onto which the yoke is attached. The jabot effect is a very flattering style.

In pattern 5365 you will find complete instructions for making the blouse shown; an illustration of it and of the stitches needed; material requirements. This blouse comes in size 16 to 18 and 38 to 40 (all given in the one pattern) and also contains a plain knitted skirt in these sizes.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The Prairie Provinces

Official Survey Gave Farm Population In 1931 As 51 Per Cent.

Development of the three prairie provinces in the present century is reviewed in a study issued by the Dominion bureau of statistics, entitled "The Prairie Provinces in Their Relation to the National Economy of Canada."

All available statistics on social and economic conditions during the past 35 years, the period in which practically all development took place are recorded.

Population of Alberta, Saskatchewan and Manitoba grew from 420,000 in 1901 to 2,354,000 in 1931, the study shows, an increase of 1,934,000 in 30 years or an average of almost 64,500 a year.

At the 1931 census 1,195,000 persons lived on farms, 709,000 in cities and towns of 1,000 or more population, 273,000 in rural areas but not on farms, and 176,000 in towns and villages of less than 1,000. Of the rural non-farm population 50,000 were in rural municipalities which are really urban in all respects except organization.

Thus the prairie provinces in 1931 comprised a farm population of 1,195,000 and a non-farm population of 1,158,000, or about 51 per cent. farm and about 49 per cent. urban or semi-urban.

In the 30 years 1,210,000 persons were born in the prairie provinces. In 1901 the number was 156,000 so that they have increased since that date by 1,054,000, besides some 100,000 prairie-province-born who are living in other provinces.

Thus the mean population since 1901, namely about 1,192,000, has just about doubled itself by natural increase in 30 years.

The average density of the three provinces (rural population, surveyed areas) is shown to be 5.02; that of Manitoba, 6.75; of Saskatchewan, 5.28 and Alberta, 4.20. The population of Saskatchewan is spread quite evenly, although, of course, thinly; that of Alberta, very unevenly while that of Manitoba holds an intermediate position between the two.

To Take Out Squeak

Private Firms Will Make Shoes For Royal Marines

To quiet the tread of the Royal Marines of Britain their shoes are to be made by private firms. Since the formation of the organization in 1662 the members have made their own footwear. Admiralty officers announce that the change of makers is for economy, but shoemakers say the real reason is that shoes made by the marines have always squeaked.

Snow In South Africa

Snow fell at Durban, Natal, South Africa, June 13, for the first time in the memory of living men, and several lives were lost in the strange mixture of weather. The inhabitants of the city, noted for its hot, humid climate, shivered in the cold wave. Railroad and highway communications were wrecked by a 12-inch rainfall. Several bodies were sighted floating in the resultant flood waters.

Parchment is different from leather in that it is not tanned.

From Coast To Coast

Canada's Precise Level System Stretches Over 25,000 Miles

Altitude, or height above sea level, of the site of any proposed development is of major importance in the orderly opening up of a new country like Canada. Consequently the provision in accessible form of information concerning exact levels is important. The task of providing such data is one of the duties of the Geodetic Survey of Canada, Department of the Interior.

In line with practically every country in the world, Canada has adopted mean sea level as its datum for latitudes. Sea level may be defined as the surface which the water of the ocean would assume where it not acted upon by the attraction of the sun and the moon or disturbed by the wind.

The actual determination of mean sea level at a primary tidal station is made by the Tidal and Current Division, Hydrographic Service Department of Marine. Hourly readings on an automatic gauge for a period of at least seven years are considered necessary for a trustworthy determination of mean sea level at a primary station.

The Canadian precise level system is based on the determination of mean sea level at five primary stations, namely, Halifax, Yarmouth, and Father Point, on the Atlantic; and Vancouver and Prince Rupert on the Pacific. By means of precise levels sea level datum is carried inland so that to-day Canada's precise level system stretches from coast to coast and has a total extent of over 25,000 miles. — Canada Week By Week.

Conscription Of Wealth

Canadian Legion Would Call On All Resources In Event Of War

Conscription of wealth and natural resources, as well as man power in the event of war, was urged in a resolution passed at the closing session of the Saskatchewan command of the Canadian Legion at Moose Jaw.

The convention in another resolution went on record as being in favor of an agreement that every nation should immediately abolish the private manufacture of all primary implements of war. A number of other resolutions were also discussed and passed. Officers of the provincial organization were elected and several reports read.

E. C. Leslie, Regina, was elected president of the provincial command; L. T. Chase, Mervin, was elected first vice-president; R. D. Roberts, Fort San, was elected second vice-president. J. C. Malone, Regina, honorary treasurer, and H. T. Pizzev, Saskatoon, T.V.S. representative.

An Eight-Eyed Camera

Developed In Germany Can Photograph 220 Square Miles

Keen interest was displayed at Munich, Germany, in military possibilities of an "eight-eyed" aerial camera recently perfected by a local optical firm. The manufacturers said the new panoramic camera is far superior to any now in use.

It was claimed the new camera can photograph in minute detail an area of 220 square miles from an altitude of 15,000 feet. The plates can be developed immediately, then put through another new device which corrects deformations of perspective, and the result assures a faithful reproduction of the countryside, ready for instant use.

It was said fast planes equipped with these cameras could fly over enemy territory and return to home airports with the complete photographic story of troop movements, gun emplacements, ammunition stores and other military information.

The Hardest Mineral

Diamond Has Qualities Very Similar To Many Humans

The solemn unwrapping at the American Museum of the largest known diamond in the world constituted a study in value. The diamond, in the words of one authority, is "the hardest, the most imperishable and also the most brilliant of minerals". It is among the rarest, and it also comes close to being one of the most useless. For those qualities it has been regarded through the ages with admiration, fear and awe—very much as hard, durable, brilliant and useless individuals have commonly been regarded by their fellow men.—New York Herald Tribune.

Germans who wish to leave their native land must pay a tax.

"One Wide River To Cross"
"The Unknown Port", Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. They are met at the railway station by Columbine Nelson, who in turn introduces Mark and Matthew Adams, two neighbors of Aunt Columbine, and the party set out for Pine Ridge, which village causes dismay to both Nancy and Jack because of its dilapidated appearance and general look of poverty.

No Go On With The Story

CHAPTER VI.—Continued

As the car moved forward even Jack was dumb. They passed a filling station—a grocery—the post office and drug store—a ramshackle place marked "Restaurant" at which Nancy shuddered—a two-story hotel, its narrow porch hugging the dusty road as if land were too scarce in this vicinity to afford a lawn.

"But there's Cousin Columbine's estate," thought Nancy, grasping at this straw. "It can't be near these awful places. Perhaps there's a side street or—"

No, Mark was steering the car between two sagging gate posts. Nancy stared ahead. Was this the boasted family mansion—this hideous frame house with peeling mustard-colored paint and a pretentious tower at one corner? A wave of rebellion swept through the girl; and something curious seemed to be happening to her ears. She raised her hands to press against them, but heard Cousin Columbine say quickly:

"Ears popping? That's only altitude, my dear. We're nearly nine thousand feet above the sea, and on almost the very spot where I was born. Father built this house after he struck silver at Leadville in '78. As you see, it's in need of a coat of paint; but it needed something else a great deal more so the paint must wait a year or two. Stop at the side door, Mark, or Matthew's likely to bump into us. Aurora! Aurora! Tubbs, where are you? Come out at once and meet my relatives. Well, Nancy," (she turned, her lined face beaming with happy pride), "what do you think of it? Does the Nelson mansion come up to your expectations?"

CHAPTER VII.

"... And all that saved me," wrote Nancy in her first letter home,

QUIVERING NERVES

When you are just on edge . . . when you can't stand the children's noise . . . when everything you do is a burden . . . when you are irritable and blue . . . try Lydia E. Pinkham's Vegetable Compound. 98 out of 100 women report benefit.

It will give you just the extra energy you need. Life will seem worth living again.

Don't endure another day without the help this medicine can give. Get a bottle from your druggist today.

Lydia E. Pinkham's
VEGETABLE COMPOUND

"It's not the cutting I mind, Miss Columbine," Aurora corrected, appearing through one door as the boys came in another, "but seeing it disappear so—so rapidly. You move the family Bible, Matthew Adam, and I'll set it right here on the centre table. It's a handsome cake, I think you'll all agree. Shall I do the cutting, Miss Columbine? I declare, it seems almost a pity."

"What do you think that cake is for, Aurora?" snapped Miss Columbine. "A parlor ornament?" (Nancy smiled though the phrase sounded unpleasantly familiar). "I'll cut the thing myself, or these young folks will go hungry. Give me that knife, and shut your eyes if you can't bear to look upon such desecration."

"You don't need to cut 'em quite so thick," remonstrated the anxious woman, hovering near. "That's a four-layer cake, Miss Columbine, and a wedge two inches at the widest part's enough for any one. Those Adam boys" (she spoke as if the young men were not present) "have got fierce appetites when they go places, which is no wonder because their mother's not what you'd call a natural cook and owns to it herself, so there's no occasion for hard feelings. If Nancy eats that big wedge now, Miss Columbine, she won't have any appetite for supper."

"Oh, leave us be!" returned the older woman with impatience. "Leave us be! Here's your piece, Matthew, and don't drop frosting on the carpet. Stand close to the stove, all of you, and let the crumbs fall into the coal hod. And be sure to tell Aurora Tubbs how good it is. That's why she's hanging 'round the door."

"It's great!" grinned Jack, at which Aurora beamed.

"It's simply marvellous!" said Nancy.

The smile widened; while Mark Adam, an appreciative hand upon his stomach, murmured: "It's superb, Aurora. I warn you now, Miss Columbine, when I get married I aim to steal your cook."

"Wouldn't it be better to marry the cook herself and keep her in the family?" asked Matthew solemnly.

This suggestion, coming from a hitherto silent, and obviously bashful young man, was not short of amazing. Nancy glanced at Matthew with new interest; but Aurora bristled.

"And me, married to Victor Tubbs for twenty years? You should be ashamed, Matthew Adam. I don't believe in divorce; and I wouldn't marry your brother if I was a widow woman and he the only male creature in Pine Ridge. He's got a fickle nature, Mark Adam has, and I've always said, give me a faithful man or none at all. Help yourself to another slice, Matthew, if you're so hungry you have to lick the frosting off your fingers. And then you'd better be starting along home. These young folks will want to begin unpacking; and if you've got some good, thick cotton stockings, Nancy, I advise you getting into them double quick. Did you travel all the way from Massachusetts in that dress? It looks real fresh. If you'll give me your trunk key I'd admire to unpack for you."

"No doubt you would," spoke up Cousin Columbine, "but it's high time you were thinking about our supper, Aurora. Better take more cake to munch on the way home, boys; and here's a couple of dollars that I owe you."

"What for?" asked Mark, puzzled eyes on the proffered money.

"For carting those trunks, and us, you donkey," she replied.

"Great thundering prairie dogs!" exploded Mark. "Do you take us for a pair of gyps, Miss Columbine? Come on, Matt, we better get going. The lady wants to pay us for a little matter of lifting trunks!"

"The cake was pay enough, Miss Columbine," Matthew assured her with a shy smile. "We wouldn't think of taking any money. We must run along now or we won't get home in time to milk. Good-night—er—good-night, everybody," he added, and hurrying to escape, collided with Aurora at the door.

This caused still further confusion, the young man apologizing, his face scarlet; and Aurora demanding to know why he didn't look where he was going.

"Land knows I'm not so small he had to miss me in the landscape," she complained as Matthew vanished, his ears pink with embarrassment, a wedge of the precious cake in hand. "If that's a third slice of cake you're cutting for yourself, Mark Adam, you'd better go easy on your supper or I won't be accountable for how you'll feel come midnight. That's a rich cake; richer'n common because of company. If you don't hurry Matthew will get home first with all the news."

"You sure do speed the parting

for BITES

MINARD'S
"KING OF PAIN"
LINIMENT

guest, Aurora," he commented, "but don't you worry about that news. I'll overtake poor Matt before that cruel blush has had time to subside. Good-night, Miss Columbine. The cake was bully."

There was surely nothing shy about this young man, thought Nancy, as he extended a friendly hand to all of them (not omitting Aurora); lifted his third slice of cake from the platter, and said: "I'll drop in to-morrow and see if you've got acclimated."

To all appearances he was addressing Jack; but his eyes were on Nancy; and Aurora burst out as the door closed: "I warn you straight off, Nancy Nelson, that you must take anything Mark Adam says to you with a grain of salt. He's as unreliable as an April snow storm; and has broken more Pine Ridge hearts than any one on record up to date. There's an innocent look about you that makes me tremble, and I feel it my duty—"

"Oh, hush up!" commanded Cousin Columbine, while Jack found sudden interest in the landscape. So Nancy looked innocent! That was a good one! He'd have to write that to Aunt Judy. And wasn't it distinctly understood that there were to be no boy friends? It was mighty queer about Cousin Columbine, mused the boy, still at the window. She was no more what you'd expect from her letter than—than Nancy was like Aurora Tubbs! There was certainly something to explain here, and—

He wheeled about at a crisp command from this surprising relative.

"Wake up, Jack. Time enough to get acquainted with Pike's Peak after you're settled. I want to show you your rooms before it gets too dark. Bring those bags along and we'll go right up. I dare say you're used to electric lights; but lamps and candles are all I can provide you with. Don't bring your coat, Nancy. It can hang in the entry, though it's cold here and will be till next spring. The stairs are steep; but high ceilings were stylish when Father built the mansion, and he wanted the best. There! This is the tower room, my dear, and I hope you'll like it. There isn't a finer view for miles around."

However prejudiced Columbine Nelson might be as to the value of her property, she did not overestimate the beauty of her view. Even in the fast deepening twilight, Pike's Peak stood out gloriously clear against the sky.

(To Be Continued)

Opening Rubber Factory

One of the newest industrial plants in Soviet Armenia is being opened at the foot of the ancient mountains of Ararat. It will produce synthetic rubber, and has been under construction for three years. One unit has started operations. It is estimated that \$240,000 will be spent in further construction this year.

Unlucky Sports Fan

Sammy Hill is just about the busiest bootblack in San Francisco—and the saddest. He bet 2,245 shoe shines at odds of 25-to-1 that Max Baer would beat James Braddock in their heavyweight fight. Now the successful Braddock winners are collecting with a vengeance.

Partial unemployment in France is still large.

Restrictions Were Lifted

British Soldier Allowed Out Of Detention Barracks For His Wedding

Army history was made at Aldershot, England, when a young gunner in the Royal Artillery was let out of detention barracks to marry a Welsh miner's daughter. Two hours later he returned from the church to the barracks to complete his sentence for a military offence.

Never before had the army authorities released a soldier to enable him to be married. The authorities had been appealed to by a friend of the bride not to spoil the wedding plans, and it was only after much deliberation they agreed to allow the prisoner out for exactly two hours.

After the ceremony the smiling couple were allowed to spend 60 minutes together in the vestry, where a brief reception was held. Then the husband returned to detention and the bride to her place of occupation.

Newspaper Advertising

Has Great Advantage Over Other Forms States Premier Pattullo

"Newspaper advertising has tremendous advantages over other forms of advertising," Premier T. D. Pattullo stated in connection with the Dominion-wide advertisements with which British Columbia presented its case for a changed relationship between province and Dominion.

"A newspaper advertisement," said the premier, "possesses stability and permanence. It can be studied at leisure, analyzed, and followed up intelligently by discussion. The printed word can not very well be contorted, and possibility of misconception is minimized."

"For public messages of importance that require careful study and cool analysis, nothing can supersede the press."

THE RHYMING OPTIMIST

By Aline Michaelis

YOUR IMMORTALITY

I do not hold your immortality
Is but a memory dwelling in my thought,
Although by night and day your face I see
And know anew the joy your beauty brought.
Nor could I be content, believing this,
That in so small a sphere your soul must dwell,
For you should go, released to taste all bliss
Through unknown regions, starred with asphodel.
If you live only in my heart and mind,
In my poor life, so warped by pain and worse,
When I go, too, your magic then would find
No other harbor in the universe!
Your heritage or immortality
Must be, past time and space, to wander free!

Diamond Well Guarded

Jonkher In Bullet Proof Case At American Museum

The \$1,000,000 Jonkher diamond is on display at the American Museum of History, but none of the 4,000 persons who saw it the first day attempted to steal it.

The diamond is in a bullet-proof glass case.

Should anyone touch the case, it would instantly vanish into a vault.

Guards who stood nearby practised sharpshooting before going on the job.

Plan Did Not Work

A customs officer at Alexandria stopped two men carrying a sack of kitchen rubbish from a ship. Eighteen chickens' heads were in the bag. The officer opened the bird's beak and out poured a quantity of opium—from each. The two men were arrested.

DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never work again. Although he is 70 years old, he proved they were wrong.

Read what he says:—

"I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I am working harder than a young man to-day. Thanks, many thanks, to Kruschen Salts. I take them in my tea, and I have recommended them to many. I could not get in or out of bed myself, nor sit up. But see me work now—12 hours sometimes. Kruschen Salts have done it."—G.J.

Rheumatic conditions are the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients assist Nature to expel these dissolved crystals through the natural channel. In addition, there are still other salts in Kruschen which prevent food fermentation in the intestines, and thereby check the further accumulation not only of uric acid, but of other body poisons which undermine the health.

Little Helps For This Week

The ornament of a meek and quiet spirit which is in the sight of God of great price. 1 Peter 3:4.

Thy sinless mind in us reveal
Thy spirit's plenitude impart;
Till all my spotless life shall tell
The abundance of a loving heart.
—Chas. Wesley

Holiness appears to be to make the soul like a garden of God with all manner of pleasant flowers, that is all pleasant, delightful and undisturbed; enjoying a sweet calm and the gentle life-giving beams of the sun. The soul of a true Christian appears to be a little white flower like we see in the spring of the year, low and humble on the ground, rejoicing as it were in a calm rapture, diffusing around a sweet fragrance, standing peacefully and lovingly in the midst of other flowers round about, all in like manner drinking in the beams of the sun.—Jonathan Edwards.

New Soil Laboratory

Wind Tunnel Is To Be Constructed At Swift Current

Construction of a wind tunnel for conducting soil drift experiments at the Dominion farm in Swift Current, Sask., will be undertaken this year.

Such equipment will be a part of a new soil laboratory to be erected at the farm at a total cost of some \$25,000 including equipment. It will be used to study the effect of wind currents on certain types of soil under different methods of cultivation in a similar manner of that employed by the research council in the study of aeronautics, for testing new wing constructions.

Forbid Hypnotism Shows

Roumania Claims They Are Dange To Public Health

The Roumanian department of public health has issued a strict order prohibiting all hypnotism and telepathy public performances, as well as all moving pictures and plays dealing with these subjects. It is explained in the order that such performances present a great danger to public health and that numerous cases have recently been reported where people suffered serious nervous shocks by witnessing hypnotism and telepathy demonstrations.

Abandoned gold and silver mines in Mexico are being reopened.

The Letter Bag

GOOD MILK FROM OLD BARN

Correspondent to the Langley Advance offers an opinion upon barn-grading which will agree with that of many dairymen. He writes:

"As you say the barn is almost a minor detail in the production of clean milk. This I know by experience, having worked on a farm in the Old Country where nothing but grade A milk was produced."

What was necessary to produce this grade of milk was as follows:

A cleaned cow, a clean milker in clean overalls, a sterilized milk pail, strainer pad and container. If the strainer pad was the least bit dirty after having the milk from about 30 cows poured through it we would hear about it from the manager.

It's the bacteria count that makes the difference between grades A, B, and C milk in the Old Country, the less thousands of bacteria in a given quantity of milk, the higher the grade. On this particular farm one of the milking sheds was at least 100 years old with hardly a window. It was a cobble-stone floor with a depression for a gutter, no water laid on, in fact if it was in B. C. at the present time it would likely be graded X. But the milk produced in the barn was grade A.

The University of Reading, which has some of the highest authorities on milk production and its products on its staff, had a thatched roof top to a few years ago, and an odd one at that, and was in other ways much like the barn referred to above, but the milk and products were all grade A.

The new British Columbia legislation requiring an extravagantly luxurious barn to produce grade A milk looks to me like a "handout" to the big dairymen, and to him with the small ones. It is just plain ignorance which is unthinkable."

"AGITATORS" AND PROGRESS

"Much is heard these days about 'agitators.' Every protest for better labor conditions, for better economic conditions, for better politics, is pronounced to be the work of 'agitators.'"

History, studied dispassionately, has a lot of import for those who today are ready to hang the agitator. An honest survey will compel the admission that there has been quite a deal of agitating since the time of absolute monarchy, since the time of the stocks, the thumb screw and the rack.

The Magna Charta, for example, came into being only after there was a good deal of agitating. Up to that time it wasn't considered right for an ordinary man to annoy the king with any opposition to his royal will. The king was divine, and the commoner was entitled to no political or economic justice unless the king so decreed.

Other steps in progress are land-marked in history by similar decrees slowly but surely removing the yoke of oppression from the necks of the common people until they had at least some personal liberty, some right to a portion of the world's blessings while here on earth, and every page in history that records progress in this upward struggle from serfdom to citizenship has been the result of "agitators."

The same has been true in the religious world. The Christ himself could rightly be called an "agitator" for his whole life was a protest against wrongs. The smug and self-satisfied Pharisees believed their system to be unimpeachable and when the Nazarene dared to condemn their hypocrisy and wickedness, they put him to death.

There is still oppression in the land. Men toil their lives out for the barest necessities in a country abundantly blessed, and of late years even the right to earn their daily bread has been denied to millions. Their only privilege has been the charity list and the public dole.

Because they rebel and complain, they are "agitators." They are met with the mailed fist when they attempt to march before the king to lay their case at the foot of their rulers. They are shoved into prison camps at the point of the bayonet because they asked for bread, or the privilege of earning it."—Marpole-Richmond Review.

ETHICS OF THE ROAD

"Ninety-nine per cent of the motorists we meet on the road are civilized motorists, but the remaining one per cent can do more damage in a few seconds than the other ninety-nine can do in a life time."

The ninety-nine per cent are not only civilized, but they are polite. When we meet on a sharp curve we will find they are well over on their own side of the road, and then some;

PINTON—LOWIS

The wedding took place at St. Mark's church, New Westminster, on Saturday of Mike, son of Mrs. Pinton and the late Mr. Pinton, of Abbotsford, and Irene, daughter of Mr. Lowis and the late Mrs. Lowis, of New Westminster.

The bride wore an apple-green chiffon dress set off by a lovely mohair picturesque hat and accessories to match.

Matron of honor was Mrs. G. McLary and Mr. G. McLary supported the groom. The reception was held at the home of Mrs. Pinton, at her home in the Poplar district.

Stewart Dixon has been appointed fieldman for the B.C. Swine Breeders' Association. E. H. Barton, secretary states the association aims to place at least 100 extra purebred breeding sows on farms in the Fraser Valley this season.

If we "toot" to go by they will go to one side and let us pass with the most amiable courtesy. It is a pleasure to meet such motorists and it makes motoring more enjoyable and less dangerous.

However, we will always have the one per cent to deal with. He is the fellow who swings around a corner on the wrong side of the road, trusting to luck that no one is coming in the opposite direction, or to his own skill in getting out of the way if he should meet a car suddenly.

There is another type who takes up the whole road when you meet him, and thinks it beneath his dignity to turn out. This chap is generally known as a road hog and is responsible for a large per cent of accidents.

But there is another species of road hog that is perhaps not so dangerous though he is just as annoying, and that is the one who lingers along the road and objects to you passing him from behind. Men with psychologies like the above have no right to be on the road; they have little or no courtesy in their make-up, and have a sort of contempt for the rights of all other motorists on the road. Could we be rid of the above, motoring would be more of a pleasure and less of a risk!—Ashcroft Journal.

King Auto Tester

This equipment is adopted by leading car manufacturers and is now available to you. Bring in your car for a test; it's a surprise!

The new "King" Special Tester—
Tests Condensers. Tests Coils with or without engine running.
Tests Ignition Cables. Tests Spark Plugs in or out of engine.
Tests Voltage of Starter. Tests Amperage Draw of Starter.
or without Engine Running. Tests Complete Ignition System.
Tests All Automobile Bulbs. Also Tests for Motor, Balance, Etc.
What current is going to your spark plugs, your coil output, are breaker points functioning properly, are points synchronized, what is voltage of coil primary—in fact the King Tester will show in a jiffy if your engine is 100 per cent. and if not, where the trouble is.

CORPORATION OF THE DISTRICT OF SUMAS, B.C.
WARNING CUTTING OF THISTLES
 Owners and occupiers of land in the municipality of Sumas are hereby notified that they must cut and effectually destroy all thistles upon their property and on the road fronting their property to the centre line of same, and upon failure to comply with this order by July 25, 1935, the work will be done by the Corporation at the expense of the land owner.
BY ORDER OF THE COUNCIL

SKILLFULLY BUILT TABERNACLE MODEL PENTECOSTAL DISPLAY
 Bible students are invited to view an interesting piece of handicraft at the Pentecostal Assembly, Essendene avenue. It is a table model of an ancient tabernacle, the original of which was erected about 1500 B.C. during the journeyings of the Israelites from Egyptian bondage to colonization of Canaan.

The model, built by Rev. D. Hilary, local Pentecostal minister, is in centre of an outer court, an enclosure of white linen curtains supported by 56 pillars. A brazen altar of sacrifice stands by the gateway and a laver of ceremonial washing for the priests is placed between the altar and sanctuary.

The Holy Place or Tabernacle is formed by an enclosure of wood overlaid with gold, 45 inches long and 15 inches high. Divided by the Vail is a special curtain of rich embroidery, making the Holy of Holies or inner sanctuary of the tabernacle a perfect cube. The only piece of furniture in this section is the Ark of the Covenant with its solid golden lid. The Holy Place has three articles of furniture, the seven-branched candlestick, the altar of shewbread and an altar of incense.

The ceiling of the tabernacle is of three layers of cloth, each symbolical, and the gate of the outer court, the entrance of the sanctuary and entrance of the Holy of Holies is of curtains wrought in rich colors of blue, scarlet and purple, and also white.

The builder of this model will lecture upon it on Wednesday evenings.

RIDGEDALE
 Pea threshing has been resumed this week, the growers reporting excellent yields.

Misses Minerva Page of Port Alberni and Celeste Page of Penticton are spending the month with their father, Mr. H. Page.

Mrs. D. Smith visited last week with her daughter, Mrs. A. Crandall of Blaine. Mr. and Mrs. Crandall are receiving congratulations upon the birth of a baby girl.

Mrs. C. Miller of Fredericton, N. B. is spending the summer with her daughter, Mrs. W. Page.

Miss Irene Kelleher of Brilliant, B.C., is at home with her parents, Mr. and Mrs. C. Kelleher, Sumas Mt. Services have been resumed in the latter a month's vacation at Orcas Island.

Mrs. L. Beharrell and family are holidaying at Cottonwood Beach.

MT. LEHMAN
 During the absence of Miss Forrester, Miss Lehman will be in charge of the library on Thursday afternoons.

The United church Sunday school picnic was held last Tuesday to Shoreacres. Three busses were necessary to transport the crowd. Sunday school re-opens September 1.

SUMAS DISTRICT
Hop Vines Flourishing
 A late harvest, but a heavy one, is anticipated in the Sumas hop gardens where picking is expected to start ten days later than last year—probably late in August. Larger crews than usual were kept busy through spring and early summer cultivating the vines, which were carefully nursed and fertilized after their six weeks immersion under flood water, and rewards of this effort are the vigorous berry clusters now forming on the vines.

No Trace of Sikh
 Police have found no trace of Utam Singh, Sumas Prairie Sikh, missing from his farm since last December. Careful check-up is being made by immigration authorities under a supposition that he may have left the country. It is stated the East Indian was seen on his farm by several persons for a week after the former hired man left.

Motorist Hits Municipal Truck
 A. Montgomery of Clinton was fined \$10 and costs in Sumas police court on Thursday, upon a charge of driving to the common danger. While endeavoring to pass a car on the Sumas highway, Montgomery hit the corner of the car and crashed into a Sumas municipal truck, which was proceeding in the opposite direction. No one was injured, but Montgomery's car and the municipal truck were damaged.

Produce Crosses Border
 International freight movement through the port of Huntingdon approximates 100 cars to the United States and 60 cars into Canada. Lumber, shingles, barley, malt, wheat screenings and fertilizer are chief of the commodities exported, while the importations are mostly fruit and vegetables.

Considerable sugar-beet acreage is being abandoned this year in Whatcom County under U.S. Federal Government quota regulations. The crop under production is thriving throughout the county.

Constable Gault of Sumas is attending the police revolver marksmanship contest in Victoria.

W. J. Knox of Ootsa Lake, B.C., is the guest of his son, W. S. Knox, Huntingdon.

Mrs. Sigler has returned from Portland and taken up residence on her farm, near Reclaim.

Mrs. Van Kasteren and daughter Agnes, are holidaying at Shore Acres.

LIBRARY SUGGESTIONS
NEW BIOGRAPHIES
A Cowman's Wife by Mary K. Rak. Mrs. Rak is a real pioneer and her stories of life on a Southern Arizona cattle range show a rare sense of humor, in spite of the fact that "all her life she must play second fiddle to a cow".

Sunshine Preferred by Anne Ellis. Mrs. Ellis tells of her long fight in sanatoriums in various parts of the United States. Rather weak at the beginning, the tale gathers strength as her amazing courage carries her through bitter disappointments. Mrs. Ellis does not dip her pen in hospital antiseptic, consequently her book is not in the least depressing.

Letters by Kathleen Mansfield. Anyone who appreciates the short stories of Kathleen Mansfield will enjoy reading the two volumes of her letters written to her husband while she was seeking to regain her health on the continent.

Pleasant Places by George A. Birmingham. Clergyman, novelist, playwright and Irishman, Mr. Birmingham looks back over his life, and tells with amusing frankness how the church influenced his literary output.

F. J. Shepherd: Surgeon by Wm. Boyman Howell. Really a history of surgery in Canada, with interesting details about the medical school at McGill University, and Dr. Shepherd's influence there. Abbotsford, B.C. R.E.C.

B. C. GAME SEASONS
 Bird game open dates for this year have just been announced, part of which are (western district):
 Ducks, except Elder ducks, Wilson snipes, coots and geese, October 19 to January 31, 1936.
 Band-tailed pigeon, September 7 to October 20 (use of live decoys prohibited).
 Blue grouse September 7 to October 31; ruffed or willow grouse, October 19 to October 31.
 Pheasants (cocks only) October 19 to November 24.
 Following are the bag limits:

geese—daily 10, limit 50; Black Brant—daily 10, total 50; Band-tailed pigeons—daily 10, total 50; ducks—daily 20 from October 19 to November 30 and 15 for remainder of season, with total of 150 for season; pheasants, cocks only, daily 4, total 25; grouse—daily 6, total 25.

Mr. and Mrs. W. T. Prasiloski of Aldergrove announce the engagement of their daughter, Agnes Victoria, to Mr. Walter Gillberg of Matsqui. The wedding will take place on Aug. 14 in Mission.

HOW TO MAKE ICED TEA

Infuse six heaping teaspoons of Salada Black Tea in a pint of fresh boiling water. After six minutes strain liquid into two-quart container. While hot, add 1½ cups of granulated sugar and the juice of 2 lemons. Stir well until sugar is dissolved. Fill container with cold water. Do not allow tea to cool before adding the cold water; otherwise liquid will become cloudy. Serve with chilled ice.

"SALADA" ICED TEA

Protect Wild Life

This is an age of organization. Men and women, boys and girls, band themselves together in clubs, associations, unions, large or small, some single isolated groups, others as branches of a Provincial, Dominion, or international body. There are clubs to promote almost every conceivable thing, or object, in which mankind can possibly be interested. Their number is legion, and new organizations spring into existence almost every week.

Many organizations have been in existence for a long time, have large memberships, and very definite objects to serve. They have long occupied a useful and honorable place in our democracy, command the respect of all, and have made worthwhile contributions to society as a whole. Members of such bodies are banded together, as a rule, in support of some great principle to which they are intensely devoted.

There are other organizations which come into being under the stress of temporarily prevailing conditions, and when those conditions change and pass away, these organizations pass out of existence, some having exerted a beneficial influence in the direction of reform and progress; others leaving little but a trail of disillusionment and loss behind them.

It would be impossible to even list, let alone classify, the organizations now in existence making appeal for the support of the public, and it is not the intention of this article to make any such attempt. Rather at this time it is proposed to direct attention to one particular organization, to which no great publicity has been given in past years, but which has been engaged in quietly, but none the less effectively, promoting a cause in which the people of Canada ought to take a very keen and active interest. On former occasions the attention of readers of this column has been drawn to other worthwhile organizations, consequently in now singling out one specific organization for a word of commendation we are making no new departure.

The organization now referred to—possibly we should refer to it in the plural and say organizations—are the Fish and Game clubs or leagues of the various provinces. These organizations are province-wide, not confined to sportsmen alone, but wide open to the naturalist and all lovers of wild life, whether they hunt with a gun or a camera or the notebook of the scientist, for, in the final analysis, the interests of these are common to all.

The objects of these organizations are to promote wild life research; by an educational campaign to instill into the minds of people the cardinal rules and laws of nature and the necessity of giving to nature the assistance of the human element, where necessary, in order that the happiness which comes from plenty can continue to exist; to secure the passage of the necessary laws to prevent extinction of declining species and to ensure the rigid observance of those laws; to endeavor to maintain the necessary surface water supply, natural cover, trees and food conducive to a bountiful supply of useful wild life, and to control or eliminate those of its enemies which threaten its continued existence.

From this abbreviated outline of objects it will be seen that, in promoting them, these organizations are likewise promoting the welfare of all, irrespective of whether they are directly interested in the preservation of wild bird and animal life or not. For example, agriculturists and livestock men, in recent years, have seen the wisdom and necessity of conserving surface water supplies brought close home to them. Equally so, is the wisdom and necessity of protecting trees from wholesale destruction in order that one of the main sources of surface water supplies should not likewise be destroyed.

As a people we have devoted far too little thought and study to the many forces and factors nicely balanced by nature to make this world a habitable, productive and beautiful land, and we have proceeded in our ignorance to do many things which have worked to our own injury with dire results and at a tremendous cost and enormous loss to ourselves and our country. We must work with nature with knowledge and understanding, not in direct opposition to nature, if we are to survive and prosper.

Apart, therefore from the attractiveness which an abundance and great variety of wild animal, bird and fish life gives to any country, the natural conditions which make such wild life possible are likewise the conditions which give beauty to a country and provide what may be regarded as the basic foundation upon which the productivity of the land rests, for without water and natural shelter the land would become a desert.

For these reasons, among others, Canadians should support organizations like the Fish and Game Clubs, if not by enrolment as active members therein, at least by extending their sympathy, support, and co-operation in achieving the objects for which such organizations exist. In a word, every Canadian should be a protector of Canada's wild life, and alert and ready to assist in maintaining those natural conditions which alone make wild life possible.

Must Import Grain

Manchuria Will Require Extra Supplies To Feed Populace

For the first time in many years, Manchuria will, this year, have to import grain in order to keep its own 30,000,000 people fed.

Because of lack of rain, it is feared that this year's crops of millet and other grains will be a failure, except in favored districts, and already the government of Manchou-kuo has made arrangements to import 50,000 tons of rice from Saigon, Rangoon and Bangkok. Additional large purchases are contemplated.

The people of Manchuria are not rice eaters, like the Chinese farther south. They subsist normally upon mostly millet and kaoliang, a species of maize.

Shorter Men For Army

British Regulations Fix Minimum Height For Infantry At Five Feet, Two Inches

The British army is to be shorter. Recruiting regulations issued recently fix the minimum height for infantry at five feet two inches. This is two inches below the old minimum. Cavalry of the line, tank corps, Royal Engineers, army ordnance corps may all accept recruits one inch below the minimum previously stipulated, provided they are otherwise fit.

The war office is determined, in view of the dearth of recruits, to bring the army up to full establishment.

The larger a bird happens to be, the longer its life span.

Latest Method Detects

Fingerprints On Cloth

Will Preserve Them Indefinitely After They Are Found

A new technic capable of developing fingerprints left on cloth—much as a snapshot negative is developed—has been added to the New York police department's bag of tricks.

The method, an indirect product of the Hauptmann case, includes the important accomplishment of preserving the original prints after they are found. Chemical baths bring out and fix the prints.

Shortly after the Lindbergh baby was kidnapped, Dr. Erastus M. Hudson, a specialist in body chemistry who makes fingerprints a hobby, was called to Hopewell, N.J., to examine the ladder used in the crime.

Using an iodine gas process, he found 500 prints where police had found none with the old powder-dusting method. Incidentally, none of the prints was identified.

Dr. Hudson was invited to direct the New York police department's crime-fighting research in this field. The successful use of silver nitrate solutions on bleached linen and other cloths of light shade, and calcium sulphide on darker fabrics, followed.

The treatment brings chemical transformation of body salts in the wax of which fingerprints are made, causing the tiny lines to become apparent to the eye. The prints may be several years old.

The new technic is superior to the currently widespread method of dusting suspected surfaces with colored powder, it was said, because the powder-dusting is effective only when the wax is fresh.

Strange Inventions

Weird Array Of Gadgets At Chicago Congress

Termed by their own president as "nuts", the gadgeteers of the 14th annual national inventors congress brought to Chicago a strange array of thingamajigs, hotnannies and doodads.

Among things which attracted spectators who viewed the exhibits of 700 inventors and 3,500 manufacturers and distributors were "lullaby bassinet," a pneumatic ladder, and a hen's nest which separates layers from liars.

If biddy lays an egg she automatically releases a latch which allows her to stroll out into the yard where the layers frolic. No eggs? The only door open to biddy is the one which permits her to enter another yard which big, bad men come to gather chickens for market.

"Many inventors are nuts, as I am," said Albert G. Burns, of Oakland, Cal., president of the congress. "But don't forget it's the nuts who generate ideas which develop into inventions."

In the home life sector also was the "lullaby bassinet" which, at the turn of an electric switch, provides remote control rocking for baby.

Grading Garnet Wheat

To Indemnify Grain Elevators For Loss Sustained

An appropriation of \$1,500,000 appeared in supplementary estimates tabled in the House of Commons, to indemnify grain elevators which may suffer loss through the separate grading of Garnet wheat. The change in grading is to come into force on August 1, 1935, and the regulation was effected in an amendment to the Canada Grain Act passed last year.

Supplementary estimates amounting to \$16,362,978 were introduced by Finance Minister E. N. Rhodes. Outside of additional appropriations for public works, the department securing the largest votes is national defence, for which more than \$3,000,000 is asked.

Battles With Reptile

Noted Traveller Secures Fine Specimen Of King Cobra

Lawrence T. Griswold, noted anthropologist who has headed a number of expeditions for the Smithsonian Institute and National Zoological Park of Washington, D.C., arrived at Victoria recently with a fine specimen of the king cobra, which, he said, nearly took his life.

One night in the Philippine Islands Griswold awakened suddenly to find the giant cobra ready to strike. He diverted its attention by throwing a blanket and then with other members of the party killed it. The reptile measured better than 10 feet in length.

Cummings museum, London, contains an elaborate display of witches' remedies collected from Londoners in the last few years.

Airport Now Obsolete

Thousands Of Dollars Being Spent On Alterations At Croydon

Improvements and extensions costing thousands of dollars are being made to Croydon Aerodrome to cope with the growth in air traffic.

When Croydon was equipped as a main airport at a cost of \$1,500,000 in 1928, it was considered adequate for all London's air services for many years to come.

Since then passenger and goods traffic has increased by over 300 per cent, and air lines radiate to all parts of Europe, the Empire and South America.

In seven years the airport has become too small for its job, although nearly all the home airlines have been transferred to Heston and Essex airports.

The lay-out of the buildings is to be altered and extended to speed up the examination of baggage and passports. Passengers who have flown from Paris in one and a half hours are sometimes held up for 20 minutes for this inspection.

When the alterations are completed in two months passports will be inspected while baggage is unloaded from the airliner.

Methods of simplifying the loading and unloading of baggage to and from motor coaches will be used.

An Interesting Exhibit

Development Of Transportation Shown In Many Working Models

From a chariot of ancient Rome, the development, up to the present day, of transportation on land, on sea and in the air, was depicted in a transportation exposition at Saint John, N.B.

Hundreds of working models showed the growth of all means of transportation from the crude vehicle of long-ago to the vastly improved and more beautiful machines of to-day.

A feature of the indoor exhibit was a miniature display of Saint John river and part of the harbor with tiny ships anchored within, and a group of 74 pictures of sailing vessels famous in the early days of Saint John.

At Union station the latest steam-locomotives were on exhibition in their "Sunday best," while at Saint John airport a fleet of Canada's speediest and most up-to-date aeroplanes was shown.

South Pole Tourist Trade

May Be Winter Sports Playground For Australians In Future

The South Pole, or rather the great ice barrier 700 miles this side of it, is envisioned as the winter sports playground of Australians of the future.

The pole is about 3,100 miles from Melbourne and the barrier 2,400 miles. The imaginative with an eye on the development of safe long-distance air travel, see the tourist of the coming day indulging in snow sports under the shadow of the active volcanoes of Erebus and Terror hunting seal, catching penguins, going kayaking among the bergs and making short morning sled trips "into the blue."

Sir Douglas Mawson, Australian polar explorer, especially has been sketching prospects for development of the Antarctic, including possibilities of initiating a seal fur trade, canning of penguin eggs and the opening of a winter sports ground.

Glider Picked Up Wireless

Wireless messages were received in a glider over Dunstable in mail week for the first time in England. Mr. G. E. Collins, who holds the British distance gliding record, made the experiment, and he said afterwards that it was highly satisfactory.

"Solomon," said Mr. Isaacs to his son. "I have decided to insure your life."

Solomon looked up piteously. "Fadder," he said, "vy must I burn."

BACKACHE

IF you have backache, dizzy spells, headaches, do not neglect your kidneys. Take Gin Pills for prompt relief at the first sign of these symptoms. You will feel better, look better—be better, if your kidneys are functioning properly.

GIN PILLS FOR THE KIDNEYS

BIG BEN THE PERFECT Chewing Tobacco

Wants Damages

Moose Smashes Automobile And Owner Wants Ontario Government To Pay

Last fall a bull moose ran into his automobile and went off with the radiator shell and a headlight rim, and now Amey Gravelle, of Nasbingsing, wants the Ontario government to pay for it. He has made formal claim to the department of game and fisheries.

Gravelle said he and a companion were driving a car filled with blankets into a new lumber camp in the Glendale Crown game reserve, north of Sault Ste. Marie, Ont.

A turn in the road brought them face to face with the bull moose. As the car went forward the moose attacked. The first smash sent the license plate into the bush. The second swipe took off the radiator shell and half a fender. Gravelle and his companion were frantic as they tried to hold their seats in the car.

Will Is Read Yearly

Has Claimed Public Attention Since Probation In 1573

There are doubtless older testaments in the vaults of the Registrar's Office, London, but none which so periodically claims public attention as that of Henry Cloker, probated in 1573, which must be read at Wren Church of St. Magnus the Martyr, Lower Thames Street, whenever a descendant of one of the original beneficiaries wishes to dispose of the property inherited. In the very nature of things the petitions for reading have become more numerous as time has passed, so that one reading a year takes place, and at every reading, according to the terms of the will, the executors, the Worshipful Company of Coopers, and the Master and Wardens must put in an attendance.

Aerial Photography

New Camera To Take Panoramic Views From The Air

An invention which may revolutionize aerial photography has been perfected by an optical firm in Germany, it was announced.

The new camera, designed to take panoramic views from the air, is equipped with eight lenses whose combined range embraces the entire terrain at all points of the compass.

At an altitude of 15,000 feet it is possible to photograph an area of 220 square miles, the manufacturers claimed.

Named By Roosevelt

It was President Roosevelt who first designated it as the White House on his official stationery. T. R. pointed out that nearly every State had an executive mansion (by which term the White House had been previously known) and that the President's home should bear a more distinctive name.

Used For Centuries

The Mohammedan lunar year of 354 days is a creation which corresponds to nothing in nature, says an Egyptologist, yet this limping calendar system has been used for 1,313 years—or, as a Mohammedan would count it, 1,354 years.

Work Is Recognized

Two Westerners Honored At Meeting Of Canadian Seed Growers' Association

As recognition of their outstanding work as seed producers, R. D. Kirkham, Saltcoats, Sask., and W. D. Lang, Cawston, B.C., were made honorary life members of the Canadian Seed Growers' Association, in convention at Edmonton. Further honor was conferred when the two growers were made "Robertson associates" of the organization, a distinction commemorative of Jas. W. Robertson, former Dominion agricultural commissioner.

Mr. Lang has been active in the association for 19 years and Mr. Kirkham for 20 years, during which time the latter has done important work in the purification of Marquis wheat. Bronze medals will be presented later.

May Take Pets On Train

New Ruling For Passengers Using Sleeping Car Drawing Rooms Or Compartments

Animal lovers may take their pets with them, and not leave them at home or crate them when travelling on trains, it was learned.

The Canadian National Railways, the Canadian Pacific and the Pullman Company announced patrons of sleeping car drawing rooms or compartments might take with them, dogs, cats or small animals, or birds, as long as they were not vicious or objectionable. But they must be in suitable containers.

The privilege does not apply to passengers occupying space in the body of the car, and the pets will not be allowed outside of their masters' rooms.

Had To Think Quickly

A barrister who was sometimes forgetful, having been engaged to plead the cause of an offender, began by saying: "I know the prisoner at the bar, and he bears the character of being a most consummate and impudent scoundrel."

Here somebody whispered to him that the prisoner was his client, whereupon he continued: "But what great and good man ever lived who was not calumniated by many of his contemporaries?"

The song sparrow has about 2,500 feathers.

WORRIED ABOUT YOUR HEALTH?

Let SASKASAL regain and maintain it

Nature gives to Canada in magnificent abundance the natural Mineral Salts found in Little Manitou. These health-giving Salts are recovered and refined by expert Chemists in the form of SASKASAL SALTS.

Thus SASKASAL in turn gives to Canadians in simple form—easy and pleasant to take—the cleansing, purifying, revivifying product of Nature itself. That is the simple story of SASKASAL Salts, so valuable to you in regaining your lost health and maintaining it in joyous vigor. If you suffer from Constipation, Indigestion, Rheumatism, Kidney or Liver troubles—take SASKASAL Salts. At all Drug Stores—69c.

A WORLD OF FLAVOR

Canada Has Built Up An Enviably Reputation In Wheat Development Work

(J. G. Carl Fraser)

The wheat breeding activities of the Dominion Department of Agriculture have been under way since 1886, when the Experimental Farms Branch was inaugurated. In the early days, Dr. Wm. Saunders, first director of the Dominion Experimental Farms, conducted the work under his own personal supervision, and such varieties as Perston, Huron, Percy and Stanley were made available to the public through his efforts. Increased activities in other lines made it necessary for Dr. Saunders to have assistance and his son, the present Sir Charles Saunders, took over the wheat breeding work in 1903 and became the first Dominion Cerealists.

On account of the high quality of its "Manitoba" wheats, Canada had built up an enviable reputation but, more often than not, early frosts proved disastrous and the demand was made to the Federal Department of Agriculture for early maturing varieties. Red Fife, the popular wheat at that time, was too late in maturing and earlier sorts had to be developed.

Dr. William Saunders had been a great believer in the possibilities of crossing wheats of suitable types in order to produce strains likely to possess the specially desired characters. From some of these crosses made under his guidance, his son, Sir Charles, was able to develop the world-famous Marquis wheat, which is perhaps the greatest single contribution to Canadian agriculture resulting from agricultural research.

This variety possessed an earliness which, at the time of its introduction in 1907, was quite remarkable. It was a week to ten days earlier than Red Fife and had quality and yield in addition.

The advent of Marquis and the remarkable expansion of agriculture to new lands made during the decade 1910 to 1920 created demands for yet earlier wheats, and Ruby was introduced during the critical period of 1916 to 1918. This variety had the advantage of being three to five days earlier than Marquis, but in threshing it had the fault of shelling too easily and never became really popular. In 1926, a variety called Garnet was distributed to over a thousand farmers and was followed in two years' time by another new Cereal Division wheat called Reward, which has since become famous as being one of the best wheats yet developed from the standpoint of quality, weight per bushel and appearance for show purposes. This variety has never been beaten for premier honors at the big shows since its introduction. Both Garnet and Reward are from five to eight days earlier than Marquis.

Work is being carried on at the present time in the West to make a final choice of the best of several new rust resistant varieties of wheat which the Dominion Department of Agriculture has developed at its Winnipeg laboratory and at the Branch Experimental Farm at Brandon, in an effort to overcome the terrible losses suffered in years when wheat stem rust is prevalent. Considerable success has crowned the efforts of the scientists working on this problem and it is confidently expected that a new rust resistant wheat of suitable quality and yielding ability will be available shortly.

Further work is being done by the Dominion Experimental Farms Branch to produce wheats as early as Garnet or Reward but which are more desirable than either. Some very promising material is under test at the present time which is expected may make further contributions to the number of good wheats already produced by the Dominion Department of Agriculture.

Variety Of Titles

The Toronto Globe says it seems to be established at Ottawa that the terms "Prime Minister" and "First Minister" both are legal; and, of course, "Premier" remains in common usage. This should provide ample variety for any head of the Canadian Government.

Students of sixteenth century English discover that there were 83 words, from amount to yerks, used in those days to describe the business of thumping or attacking an opponent.

Only a cat has nine lives; drive carefully says the Brandon Sun.

Must Be Best Quality

Wheat Seed Growers Warned Against Using Inferior Grade

If Canada is to maintain her status as a wheat producing country she must pay more attention to quality. Prof. Robert Summerby, Quebec, told the annual convention of the Canadian Seed Growers' Association in his presidential address at Edmonton.

"Owing to the acute situation in which we find ourselves in relation to markets at no time in the history of our country was it more important than now that we should pay attention to the yield per acre and more particularly the quality of our crops," Prof. Summerby declared.

Object of the association, he said, was the raising of the level of yield, quality and value of farm crops in Canada through the distribution and use of high quality seed.

A large proportion of farmers are still using seed of inferior grade and the educational work of the association must be continued and extended to drive home to these farmers the importance of good seed.

It has been difficult for seed growers of recent years to sell seed, at profitable prices. Government departments and grain companies by means of a well directed seed exchange program have facilitated the distribution of the best varieties of quality seed, Prof. Summerby stated.

Record Honey Crop Expected

B.C. Looking For Higher Production Than Last Year

British Columbia's 1934 crop of 1,512,075 pounds of superb quality honey set up an all-time production record for the province, says A. W. Finlay, Huntingdon, provincial bee inspector.

Practically the whole crop has been disposed of, and the average price was 10½ cents per pound. British Columbia apiarists received approximately \$160,000, he states.

With a comparatively small carry-over, the industry is in a fine healthy condition this year. Providing atmospheric conditions are right and there is plenty of nectar-bearing flora, an even better crop than 1934's will be harvested.

Considerable damage was done to hives by flood and storms last winter, especially in Sumas Prairie area, where in one instance 60 hives were buried under 10 feet of water for several weeks.

However, B.C. apiarists are not one whit discouraged. Most of them have started over again on a larger scale than ever before.

When Dreams Were Simple

Ancient Interpreter Stuck Close To Their Face Value

The psychiatrists meeting in Washington were told that the ancients knew psychoanalysis. No less a personage than Hippocrates, father of medicine, is said to have treated nervous ailments by analyzing the patient's dreams. Presumably there is sufficient authority for the claim, yet the ancient world as known to the layman seems to have taken its dreams in quite the opposite sense from the psychoanalyst.

The ancient dream interpreter stuck close to face values. When Pharaoh dreamed of seven fat kine and seven lean kine it meant seven years of plenty and seven years of famine. When Jacob dreamed about the ladder ascending to heaven the accepted interpretation was close to the text of the dream. You can only wonder what one ladder and seven emaciated cows would become in the hands of a psychoanalyst.

Very Few Left

It is noted that the death of Viscount Byng leaves but one outstanding military leader of the Great War surviving in England, says the Toronto Mail and Empire. That is Field Marshal Viscount Allenby. In France, Petain and Franchet d'Esperey, in Germany, Ludendorff and Mackensen and in the United States Pershing are the remaining commanders who played great roles in the struggle.

Have Different Meaning

A language professor lists 385 confusing words which are so similar in English and Italian as to cause students to think they have the same meaning in both languages, which they have not.

Millions For Armaments

Nations Of The World Spending More For Defence Purposes

Nations of the world spent \$500,000,000 more for national defence in 1934 than they did in 1933, the armaments year book of the League of Nations disclosed.

An outstanding statistic in the publication was the fact that Soviet Russia has an army of nearly 1,000,000 strong, far larger than those of other powers.

At the end of 1934 the strength of the red army was 940,000 men, but this figure does not include reserve and non-territorial forces.

Great Britain's land forces, exclusive of India but including general colonial and naval troops was 460,620.

Japan's army in 1934 was estimated at 299,824 men and 19,399 officers. Navy effectives were 139,688.

The army of France last year was given as 360,496 in home territory with a total, including overseas forces, of 550,678.

The year book gives Germany's old armament figures, placing the army at 102,000 as of January 1, 1934, and says nothing about the new army and navy which the reich is now creating.

Italy's average conscript army was given as 390,000.

The book placed the United States army at 137,679 men as at June 30, 1934. National guard and reserves brought the number up to 439,240.

Had Large Water Bill

Fisherman Kept Thirty Live Shrimp In His Bath

There is an ardent fisherman in Somerville, Mass., but his love for the rod and reel is costing him some extra money. When he received a \$40 bill for water he used during the past three months he complained to Mayor James E. Hagen so bitterly that the executive had Joseph L. Phillips, water commissioner, detail inspectors to the home. The inspector learned there that a stream of water was running in the bathtub, in which 30 live shrimp were sporting.

Funny-Looking Race Horse

England's funniest-looking race horse is named Grock, after a famous French clown. He has a completely white face on a chestnut body, colorless wall eyes and no eyebrows. He has four white "stockings" on his legs, which make him look as if he were wearing spats. He wins a race occasionally at that.

Organize Water Surveys

Geologists To Comb Drought Areas For Water Supplies

As a contribution toward alleviation of drought conditions in Western Canada, steps have now been taken by the department of mines to conduct exhaustive water investigations in southern Saskatchewan and south-eastern Alberta.

Dr. E. R. MacKay, of the geological survey, will organize and direct these investigations, planned by Hon. W. A. Gordon, minister of mines.

Dr. MacKay's surveys, upon which a large contingent of university students and graduates in geology will be engaged all summer, will extend over an area of approximately 100,000 square miles or more than 60,000,000 acres. The work is one of the projects in the \$1,000,000 program of geological surveys and investigations provided for in the Supplementary Public Works Construction Act, 1935, and is also included in the plans of Hon. Robert Weir, minister of agriculture, under provisions of the Relief Act, 1935.

Organizing at Regina and making his headquarters there, Dr. MacKay is to direct activities of about 85 men. Sub-parties of three men each, under supervision of competent geologists, are to comb the drought area for information on ground water supplies. They will take cognizance of all wells and borings, collecting data from which to deduce the source, extent and quality of water to be obtained by boring.

Had Plenty Of Nerve

Woman Collected Fare From Railway Employees To Travel By Bus

With bus competition the biggest headache railroads are experiencing, it remained for a woman at Arkansas City, Kansas, to force the Santa Fe offices to lend financial assistance to a bus line.

She came into the railroad offices and pleaded she had to go to Bagnell, Mo., but had no fare. Employees of the railroad collected \$4 and handed it to her.

She was profuse in her thanks. "I'm so grateful," she said, "because I must go see my grandmother." And, as she walked out of the office, she added:

"Now I'll have to hurry to find out when I can catch a bus to Bagnell."

The best insurance against automobile accidents is a Sunday afternoon nap.

Study Of Sun Spots Reveals To Scientists Many Interesting Facts

Anxious For Improvement

Town-Dwelling Natives Of South Africa Want Education

Changes in the South African native outlook which he ascribed to the influence of European civilization, were discussed at Cape Town by Dr. A. W. Roberts in a lecture on native problems.

Town-dwelling natives, he found, had completely severed all ties between themselves and rural natives. Their ideas in time would become entirely European. Although they spoke their own language, they preferred to use the English construction and no longer cast their own language in its original mould. Natives had also lost the idea of war, although there were still small faction fights.

Their ideas on marriage had also undergone a change. In the reserves there was room for a man to have many wives; but in locations there was no room ever for a second wife. Contact with Europeans had enlarged the native's mental vision. What natives most eagerly sought after to-day was knowledge and education for their children.

Even outwardly natives had changed through their contact with European civilization, said Dr. Roberts. In the 54 years that he had been an observer of native life he had seen a slight modification of countenance. Their faces were becoming thinner; the heavy looks, chin, hair and lips were becoming more European looking. But the native would not change in the essentials of life. As he was to-day, so he would be a thousand years hence. He would have the same love of laughter, song and friends.

Gallivanting Monkeys

Escaped Animals Cause Quite A Commotion Amongst Officials

Suggestions were pouring into a Montreal amusement park at suburban Cartierville as to the best means of catching 10 monkeys who have been missing lately.

Twelve of the little fellows escaped from their island prison when an employee at Belmont Park left a plank across their moat after he had fed them.

Two were recaptured but the others are believed to have taken to the trees in the well-wooded nine miles of country stretching between Cartierville and Montreal.

An official suggested a way of catching the playful animals. He advised the purchase of two, perhaps three, bottles of Scotch whiskey. The spirits, diluted with water, would be distributed about the Cartierville neighborhood in cups.

The monkeys, convivial creatures, would descend from the trees and put down the whiskey like seasoned "topers," it appears. As they have no heads, their capture then would be easy.

The obvious catch, of course, was the monkeys might not be first to the cups. Park authorities were taking that into consideration in deciding whether or not to adopt the plan.

Received His Money

Man Refused To Be Done Out Of Halfpenny

A citizen of one of the larger West Riding towns had occasion to make a claim from the railway company for the unused half of a summer ticket. As the railway people emphasize the point that they do not charge or refund fractions of a half-penny he was surprised and gratified to receive a postal order for 3s. 6½d.

On presenting the order for payment the Yorkshireman was handed 3s. 6d., with the explanation that the post office does not pay out halfpennies. Nonplussed for a moment at the prospect of losing the unexpected copper, he recovered his poise swiftly and asked the officer to give him back the order. Then he bought a halfpenny stamp, attached it, and demanded 3s. 7d. The post office paid.—Manchester Guardian.

Dr. Fred Allison and Edgar J. Murphy have discovered that gold, platinum, and five other chemical elements are mixtures of atoms chemically the same, but different in weight.

If cherries or berries are rolled in flour before putting them into the pie crust the juice will be thickened and will not run out.

An important astronomical study and one which may in time provide a basis for valuable predictions concerning the weather and living and economic conditions is that of sunspots. These spots appear from time to time on the face of the sun and fluctuate in numbers and size in an irregular period with an average length of 11.1 years, commonly called the "eleven-year sunspot cycle". Sunspots are usually accompanied by large areas of bright clouds, high in the solar atmosphere and consequently relatively strong emitters of ultra-violet light. When sunspots are most numerous ultra-violet light reaching the earth may be double the amount received when they are scarce. Ultra-violet light ionizes the upper atmosphere of the earth and when spots are numerous there are more aurorae, greater disturbances in terrestrial magnetism, telegraphy, and radio than when they are scarce. Ionization promotes haziness and cloudiness in varying degrees during the progress of the sunspot cycle and serious changes in weather and effects on living things result.

Investigations at the Dominion Observatory, Department of the Interior, Ottawa, of the Canadian records of temperature, precipitation, thunderstorms, agricultural grains, grasshoppers, grouse, rabbits and furbearers, and measurements made at the observatory of the annual growth-rings in trees from various places in Canada, reveal the influence of the sunspot cycle in varying extent and phase, dependent on the region. The influence is of course only an average one, and is complicated in individual years by the many other factors involved. In the long run, however, its effects are clearly indicated.

Temperatures throughout Canada are higher at sunspot minima than at maxima. The range varies from about 1 degree Fahrenheit to 4 degrees Fahrenheit with a mean value of about 2 degrees Fahrenheit. In the Prairie Provinces the range is high, Calgary for example showing 4 degrees Fahrenheit higher temperature at minimum than at maximum in the mean.

Thunderstorms are more numerous at sunspot minimum than at maximum in general throughout Canada. The Toronto records show about 30 per cent more thunderstorms at sunspot minimum than at maximum. Forest fires due to lightning consequently fluctuate in numbers, in the sunspot cycle.

Precipitation at inland points is greater at sunspot minimum than at maximum, the Prairie Provinces having in the mean about 50 per cent more precipitation at minimum than at maximum of spots. At oceanic points, such as St. John's, Newfoundland, the opposite is the case, greater precipitation occurring at sunspot maximum. Other points blend these terrene and aequene reactions of opposite phase in varying degrees.

Forms of life are affected in harmony with the particular meteorological cycle in each region. At inland points the annual growth-rings of trees and the numbers of grasshoppers, grouse, and rabbits are considerably greater at or near sunspot minimum than at maximum. A range of from 17 to 27 bushels to the acre in the average of Canadian wheat, oats, barley, and rye is shown in the mean eleven-year sunspot cycle for the years 1908 to 1929, the greatest mean yield occurring near sunspot minimum, though the record is far too short for precise evaluation of the sunspot influence. Potatoes for the same interval show a 25 per cent greater yield at sunspot minimum than at maximum. All such records should of course be considered for each region separately.

The last sunspot minimum occurred near the end of 1933 and the next maximum will probably be in the middle of 1938. Fuller knowledge of the sunspot cycle will, it is believed by scientists, eventually assist in permitting long range weather forecasts of a general nature, thus providing valuable information relating to forest protection, wild life conservation, and other matters of social and economic importance.

Parachute Regulates Speed

When you jump out of an airplane with an open parachute, you proceed to descend to earth at the rate of from eight to nine miles an hour. But leap without one and you drop like a plummet at the rate of 118 miles an hour.

The SNAPSHOT GUILD

NEW ANGLES

It's the unusual that attracts attention

Some people have the notion that the only pictures worth taking are those of unusual things. They take a camera along when they travel but seldom use it at home, unless something special is happening. But, believe it or not, some of your greatest picture possibilities are around and near your home. "But," you may say, "I have already made good snaps of the house, the family, the pets, the garden, and the new car. What else is there to show?"

It's a safe wager that there are dozens of other picture possibilities, and all of them as interesting as the ones now in your album.

The secret of finding them is simply a matter of keeping your eyes open. Get the habit of looking at things—everything—as though you had never seen it before. It's quite amazing the way this habit will sharpen your interest—now dulled by sheer familiarity—in even the most commonplace things.

Not all of us are interested in photography as an art—and if you don't believe it is an art, visit one of the salons or study some of the pictures in the advertising appearing in the better magazines. Is there any reason why we should not strive for artistic snapshots? Back of every fine, prize-winning picture is some one who has kept his eyes open for the unusual.

Don't be afraid of doing things in unusual ways. It's really a spring tonic to take pictures of old things and scenes from a different viewpoint. "Candid" photography and taking pictures at unusual angles were discussed in a recent Snapshot Guild, but perhaps some of you missed it. The point made in that article was not to have people in stiff, unnatural poses when taking snapshots. Snap them when they are doing something, or at least apparently doing something, instead of having them stand as stiff and straight as a totem pole. Study your various subjects for unusual angles from which you may snap your pictures for unusual effects.

At the present time, take it for granted that present-day cameras, films, and modern photo-flood and photo-flash lamps give you unlimited scope for unusual, fascinating snapshots. To-day almost any picture is possible—and at any time.

You are progressing in your use of a camera when you reach that stage when your friends say, "Well, look at that picture! I've seen that spot every day for the last ten years and never dreamed it had the makings of a picture like that." Such praise will surely thrill you. Maybe you have heard those words already! If you have—congratulations!

JOHN VAN GUILDER.

Your Clothing Costs Less at Daly's Dry Goods Store!

LADIES' WOOLLEN BATHING SUITS
Plain or fancy patterns. Clearance of all last season's models, in values to \$3.95; sizes 34 to 42—

Dalbert Kendall is visiting at the home of Mr. and Mrs. P. Zalesky.

ABBOTSFORD

Master Robert Lamont is spending several days in Vancouver with relatives.

Mr. and Mrs. P. Grossman are away on a canoeing trip. Mr. Grossman is a member of the library staff.

Mr. and Mrs. M. Weekes left on Sunday for a motor trip to Portland, Ore., and vicinity.

Mr. W. Scott is back at work after a week's holiday.

Miss Norene Atkins visited relatives in Vancouver last week.

Members of Abbotsford A.Y.P.A. are guests tomorrow of the Mission organization, when a tennis and ping-pong tournament will be held.

Fergie Webster and Billie Beestone are holidaying at Cultus Lake for a week.

Misses Roberta Ralston, Jean Tucker, Hester Heller, Mrs. Ralston and Mrs. Heller spent a few days at White Rock last week. Vic Heller and Lawrence Carnegie also spent a few days in camp there.

Under instructions of Mr. H. L. Atkins a crew of men is busy renovating the foundation and framework of the Langley hotel, which will be opened in a few weeks.

The infant daughter of Rev. and Mrs. T. L. Rimmer, Shirley Ann, will be christened at next Sunday morning's service.

A small party was held at the home of Mr. and Mrs. H. C. Green, Poplar, on Tuesday evening, on the occasion of their daughter Edna's birthday anniversary.

SILVER WEDDING CELEBRATION

On the occasion of their silver wedding anniversary, Mr. and Mrs. Douglas Gilchrist entertained at their home on Saturday evening.

The hostess, assisted by her sister, Mrs. Nellie McCrory, served dainty refreshments, consisting of tea, cake, sandwiches and ice cream.

Among the guests were Rev. and Mrs. S. Clarke, Mr. and Mrs. T. Kirkpatrick, Mr. and Mrs. W. Page, Mr. and Mrs. R. Cooper and Miss Betty Cooper, Mr. and Mrs. T. Seldon, Mr. and Mrs. H. Shogren, Mr. and Mrs. J. Reid, Mrs. A. Shaw, Mrs. C. Miller, Mr. A. Brown, Mr. J. McCrory, Mrs. McCrory.

Mr. and Mrs. Gilchrist were married July 20, twenty-five years ago, at the home of the bride's mother, Mrs. M. Brown, at Vermillion, Alberta.

Mr. Gilchrist gave up his profession as a teacher to serve overseas during the entire duration of the war, after which they came to B.C., and located on a fruit farm in the Glenmore district. Mr. Gilchrist was for seven years principal of Whatcom Rd. public school, retiring two years ago.

Both Mr. and Mrs. Gilchrist are active workers in religious and community affairs. Mrs. Gilchrist having served for several years as president of the Woman's Association of Clayburn United Church.

Improvements are being made to the front of Huntingdon post-office. Mr. Owens displaying his ability as a carpenter in the work.

Mr. Mel Fadden plans to rebuild his barn, recently destroyed by fire, when his hay harvest work is over.

We treat you right...

PHONE 81

Abbotsford & District Conservative Association

SPECIAL MEETING

in ODDFELLOWS HALL on FRIDAY, JULY 26th; 8 p.m.

If interested, please attend!

HAYING TIME HERE

The last week's sunny weather has quickly ripened most of the forage all over the district, and farmers are busy in the hay fields now.

Although some hay was damaged by the heavy rains of two weeks ago, the majority of the crop is good, particularly oats and clover. Hay baling on Sumas and Matsqui prairies is now in full swing.

ABBOTSFORD

Mr. George Preston has returned to work at the Abbotsford Bakery, having recovered from his appendicitis operation.

Mr. and Mrs. M. Switzer and family and Mr. and Mrs. G. Duncan of Drumheller are holidaying at White Rock.

Mr. and Mrs. G. Fraser of Neepawa, Man., are visiting Mr. and Mrs. L. Buck. Mrs. Fraser is Mrs. Buck's sister.

Nothing beats good leather ...but the Hammer!

Modern machinery and expert workmanship make possible the repairing of shoes that otherwise would be no good.

Bring in that old pair and let me examine them. You'll find it worth while to have them repaired!

A. McDONALD

Essendene Ave. East

This Newspaper...

will not only keep you advised of the developments in your district, the current news events of local organizations, items about your neighbors and friends, but it offers you a distinct service in the saving of your money upon all ordinary purchases. "I saved a whole year's subscription out of my grocery buying last Saturday night by buying from the ads," remarked one of our readers. Another reader told us the small sale and auction ads. enables him to save on many articles. Can YOU afford to be without it for

...10 cents a Month

Responsibility.

for low cost of your materials, for suitable lumber and supplies for safety of workmen in our employ, and—THAT YOU GET A WORKMANLIKE BUILDING JOB at a low price. See us for BUILDERS' SUPPLIES
